

# Portable Weather Station Documentation

**Autors:** Daniel Jose Centeno Gonzalez and Lorena Garcia Plaza

## Introduction

A portable weather station offers portability, accurate data, and enhanced safety. It can be easily transported to different locations, providing precise and localized forecasts. This helps in decision-making for various activities and sectors. The station's portability enables monitoring of essential parameters, alerting users to potential weather hazards in advance. With measurements of temperature, humidity, thermal sensation, wind speed, wind direction, UV index, rain fall and then you can process the data and analyze it. In this documentation, you will find everything about this project.

# Weather Station Sensors

Measurement	Sensor	Measurement unit	Datasheet
Temperature	DHT22	°C	<a href="#">DHT22</a>
Humidity	DHT22	RH	<a href="#">DHT22</a>
Thermal sensation	DHT22	°C	<a href="#">DHT22</a>
Wind Direction	Sparkfun Weather station kit (SEN-08942)	Cardinal Points	<a href="#">SEN-08942</a>
Wind Speed	Sparkfun Weather station kit (SEN-08942)	m/s	<a href="#">SEN-08942</a>
Rain Gauge	Sparkfun Weather station kit (SEN-08942)	mm	<a href="#">SEN-08942</a>
UV index sensor	P1918 UV sensor	1-11	<a href="#">P1918 UV sensor</a>
