# **Workshop Notes**

## **Preparation / Prerequisits**

- Download ...
- Install ...
- Print ...

### Introduction

- The work of the EOLab Team → Current state of development
- Image Classification
- · Object detection
- · Mini drones with OD

#### **Hands On**

- Connect SNAP to the server in Nvidia Jetson
- Image classification game
- Object Detection ??

## Reflection

# **Main Achievements (internal discussion)**

# SNAP! and Mini-Drone (Harley, 3 mins, live, with Alonzo pilot)

- Tello SNAP Backend (Javascript backend, communication software interface, Wifi, client, binding to IP address), URL, eolab.de github
  - One drone has a default IP, it is in "station" mode (the drone is AP, AP mode), 192.168.10.1
  - Tello AP mode (client to Wifi), necessary for more than one drone in network and/or interaction with Jetson
- Tello SNAP! category (collection of SNAP! Javascript blocks), websocket interaction with the interface talking to the drone
