- Print ...

Introduction

- The work of the EOLab Team → Current state of development
- Image Classification
- Object detection
- Mini drones with OD

Hands On

- Connect SNAP to the server in Nvidia Jetson
- Image classification game
- Object Detection ??

Reflection

Main Achievements (internal discussion)

SNAP! and Mini-Drone (Harley, 3 mins, live, with Alonzo pilot)

- Tello SNAP Backend (Javascript backend, communication software interface, Wifi, client, binding to IP address), URL, eolab.de github
 - One drone has a default IP, it is in "station" mode (the drone is AP, AP mode), 192.168.10.1
 - Tello AP mode (client to Wifi), necessary for more than one drone in network and/or interaction with Jetson
- Tello SNAP! category (collection of SNAP! Javascript blocks), websocket interaction with the interface talking to the drone
- https://wiki.eolab.de/doku.php?id=drones:mini_drones:snap_tello

Object Detection (Ilgar, 3 mins)

- Based on Harley's presentation on Tello SNAP! interaction
- Object detection, Jetson
- Challenges
 - Video stream from Tello drone to SNAP!
- Frame rate incl. analysis is 7 fps
